REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Prior art listed in the attached PTO-892 form considered to be pertinent to the submitted application.

Minakuchi discloses a motor speed control system that detects a rotational speed of a motor, compares a detected output signal with a reference voltage or a reference frequency to produce an error signal, produces a saw-tooth wave signal of an appropriate repetition frequency, compares the error signal with the saw-tooth wave signal to produce a switching signal, and drives a motor by the switching signal to control the speed of the motor.

Kearns teaches motor speed control system, wherein the circuit is provided for developing a signal proportional to motor speed. The structure includes a source of referenced energy that is fed to the motor and comparing of the developed motor signal with the reference signal.

However, none of the cited prior art teaches or suggests in combination:

- A controlling device connected with the inductive circuit and the comparative circuit for receiving the control signal and gradually increasing a current flowing through the inductive circuit corresponding to the control signal, thereby eliminating the peak current introduced when the inductive circuit is actuated.
